SUPPLEMENTARY INFORMATION: The BNSF Railway Company requested a temporary deviation from the operating schedule of the Galveston Causeway Railroad Vertical Lift Bridge across the Gulf Intracoastal Waterway, mile 357.2 west of Harvey Locks, at Galveston, Galveston County, Texas.

The bridge has a vertical clearance of 8.0 feet above mean high water, elevation 3.0 feet NAVD88, in the closed-to-navigation position and 73 feet above mean high water in

the open-to-navigation position. In accordance with 33 CFR 117.5, the draw shall open on signal for the passage of vessels.

This temporary deviation allows the vertical lift bridge to remain closed to navigation from 7 a.m. through noon, daily, February 2 and February 3, 2015. During this time, the bridge owner will complete tie replacement, surfacing, and signal work. If the vessel can safely pass without an opening, the vessel may pass at the slowest safe speed. The bridge can open in case of emergency.

Navigation at the site of the bridge consists mainly of tows with barges and some recreational pleasure craft. Based on known waterway users, as well as coordination with those waterway users, it has been determined that this closure will not have a significant effect on these vessels. No alternate routes are available.

In accordance with 33 CFR 117.35, the draw bridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation.

This deviation from the operating regulations is authorized under 33 CFR 117.35

Dated: January 9, 2015.

David M. Frank,
Bridge Administrator,
Eighth Coast Guard District.
